

Favour Osemujiame Atane

Business Intelligence & Data Analyst

Lagos, Nigeria | 09138199761 | atane.favvy1@gmail.com | linkedin.com/in/favour-atane | github.com/Favour-Atane

PROFESSIONAL SUMMARY

Business Intelligence Analyst with 4+ years building dashboards, data models, and warehouses that stakeholders actually use. Deep hands-on experience with Power BI, Snowflake, SQL, dbt, and medallion architecture, backed by measurable results: over 99.9% pipeline uptime, a 60% improvement in operational planning, and a 15% lift in customer retention. Comfortable owning an engagement end to end, from the stakeholder conversation to the finished report.

TECHNICAL SKILLS

BI & Visualization: Power BI, Tableau, Looker Studio, SSRS, Streamlit, Sigma, Domo

Databases & Warehousing: Snowflake, SQL Server, Azure SQL, Synapse Analytics, PostgreSQL, BigQuery

Data Engineering: Azure Data Factory, Microsoft Fabric, Databricks, dbt, SSIS, Git/GitHub, Jira

Programming & Analytics: SQL, Python

Architecture: Medallion Architecture, Lambda Architecture, Kappa Architecture

Automation & AI (supporting): n8n, Power Automate, Make.com, AI Agent Development

PROFESSIONAL EXPERIENCE

Senior Business Intelligence Analyst

June 2026 — Present

Workaholic360 — Remote (client-based engagement)

- Own stakeholder-facing BI on a client engagement (client confidential under NDA), partnering with the Director of Global Business Intelligence and stakeholders across departments
- Sit directly in stakeholder meetings to translate data problems into insights teams can act on and understand without a technical background
- Operate within a medallion architecture in Snowflake, using dbt for transformation and Git-gated review before promotion between layers
- Built a Streamlit self-service tool letting end users generate and adjust their own reports
- Currently building an internal BI reporting initiative used across multiple departments

AI Automation Engineer

July 2025 — Present

The Jada Squad — Dubai, UAE

- Built two AI agents automating client reporting workflows, including one that cut a monthly report cycle from about two weeks to a few minutes
- Built an invoice-to-pay automation with 3-way matching and intelligent exception handling, improving accuracy and consistency in financial reporting data
- Built a web dashboard surfacing extraction accuracy, coverage, and data quality trends in near real time across 1,000+ venues

Data and Analytics Associate

December 2024 — June 2025

The Jada Squad — Dubai, UAE

- Architected an AI-powered menu extraction pipeline processing 1,000+ restaurant menus, cutting manual processing time by 85% and achieving 94% extraction accuracy in production
- Built data pipelines using Azure Data Factory, Databricks, and SQL stored procedures, automating ingestion from 10+ data sources into clean, stakeholder-ready datasets
- Designed a Bronze-Silver-Gold medallion data warehouse achieving over 99.9% pipeline uptime, with slowly changing dimensions capturing full historical change
- Built a Lambda architecture processing 2M+ streaming events daily with under a minute of latency, improving local operational planning by 60%
- Segmented 20,000+ customers for lifetime value and churn analytics, contributing to a 15% lift in retention through targeted executive scorecards

Black in AI Safety and Ethics (BASE) Fellow

April 2026 — July 2026

Remote

- Researched AI governance and assessment ethics; authored a policy brief on AI verification and deployment governance and a policy memo on Nigeria’s AI environmental sustainability gap

Data Analytics Instructor April 2024 — December 2024

Digital Fortress Institute — Lagos, Nigeria

- Delivered advanced data analytics training to 50+ professionals in Excel, Power BI, SQL, and Python, resulting in a 25% improvement in data handling proficiency

Mentorship Program Leader July 2024 — November 2024

Independent — Remote

- Founded and managed a mentorship program supporting 50+ women in data analytics, delivering personalized learning plans that produced a 30% technical skills improvement

KEY PROJECTS & ACHIEVEMENTS

Enterprise Data Warehouse for Research Facilities

- Designed a medallion architecture (Bronze-Silver-Gold) consolidating 10+ sources; achieved 99.9%+ uptime with full historical change tracking

Breaking Down a 13-Table Join (Snowflake)

- Rebuilt a monolithic 13-table join into reusable fact and dimension views, improving query speed and letting other teams reuse the same logic

CERTIFICATIONS

- SnowPro Associate: Platform Certification
- Microsoft Certified: Fabric Data Engineer Associate
- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Azure Data Fundamentals
- Python Data Associate — DataCamp
- SQL Associate — DataCamp
- Oracle Analytics Cloud 2025 Certified Professional
- Oracle Data Platform 2025 Certified Foundations Associate
- Oracle Infrastructure 2025 Certified Foundations Associate

EDUCATION

University of Benin March 2023

Bachelor of Science in Microbiology

Tech 4 Dev Women Techsters Fellowship March 2023

Data Science and A.I.

Black in AI Safety and Ethics (BASE) Fellowship April 2026 — July 2026

AI Governance and Assessment Ethics

AREAS OF EXPERTISE

Data Engineering & Architecture | Business Intelligence | Data Warehousing | Dashboard Development | ETL/ELT Pipeline Development | Customer Analytics | Research Analytics | Financial Analytics | Real-Time Data Processing | Training & Mentorship
